LPKF is one of the world's leading providers of laser systems for production of electronic components. Around 70 percent of the company's sales are generated in Asia. LPKF will exhibit a cross section of its systems at the SMT/PCB & Nepcon Korea trade show from April 2 to 4, 2014. At Booth 117 in Hall C, LPKF will present the UV-Laser MicroLine 2120 Si for depaneling of PCBs. Laser Direct Structuring (LDS) represents another core area of the presentation. In this process, a laser is used to produce traces on three-dimensional parts – for especially compact, light, and economical electronic components. Besides the LPKF Fusion3D 1500 production system, the prototyping solution composed of a LDS paint (LPKF ProtoPaint LDS), the ProtoLaser 3D prototyping laser, and the ProtoPlate LDS instant metallizing will be shown at the Nepcon booth.

### About LPKF

LPKF Laser & Electronics AG manufactures machines and laser systems used in electronics fabrication, medical technology, the automotive sector, and the production of solar cells. Around 20 percent of the workforce is engaged in research and development.

Product and brand names are trademarks of LPKF Laser & Electronics AG, registered among others at the US Patent and Trademark Office: LPKF® and the company logo, # 2,385,062 and # 2,374,780; Solarquipment®, # 3,494,986; ProConduct®, # 3,219,251; Allegro®, # 3,514,950.
