

For our customers:

The name REACH refers to an EC regulation directly applicable in the member states of the EU and entitled "Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18.12.2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) and establishing a European Chemicals Agency".

Substances concerned:

The substances included in the candidate list (available at <http://echa.europa.eu/candidate-list-table>) according to Article 7 of the REACH Regulation are listed in the safety data sheets or user manuals enclosed with the products.

REACH and SVHC Compliance in LPKF products

LPKF Laser & Electronics SE implements the REACH regulation in the labeling of its products and the associated safety data sheets or user manuals to the best of its knowledge. A new process was introduced in 2023 for this purpose, which is described in more detail in the sustainability report. The process is based on the identification of SVHC (substances of very high concern) in our suppliers' articles, the plausibility check of information in the supply chain, and the documentation of SVHC found. We are in close contact with our suppliers and regularly check our own formulations against the current candidate list. Should the quality, the ability to deliver or individual properties of our products delivered to you change in connection with the REACH regulation, we will inform you about this and take necessary measures with you, within the legally required scope.
